26th May	Deadline for handing in project
14th June	Presentation evening

KS3 Extended Project

**Think Big,
Challenge your Mind.**

Extended Project

**Leaflet made by
Megan Kyte and
Maisie Swash**

What is the Extended Project?

The extended project is for all Key Stage 3 students who wish to extend their knowledge and skills in an area that they are interested in and passionate about.

You can choose what to do in your project, how to do it and you can present it in any way that you would like. While researching, you will be able to use resources in the library at school or, if you have access to it, the internet at home, it is up to you! Many pupils have used family and friends as contacts and have produced practical and written projects using resources in business and the community.

You will also be allotted a staff guru who can help you complete your project and we will hold meetings throughout the project to catch up on where we have all got to.

We recommend that you spend quite a lot of time on your project as it needs to be something that you are proud of. This means that you need to be dedicated to researching your topic and producing your final product.

How would the Extended Project benefit me?

From the extended project, you can produce a quality piece of work that you are proud of. It will impress your teachers, friends and family and it is also an impressive thing to be able to tell future employers or colleges and universities. You will learn how to use your time effectively and learn about something that you love.

How do I take part?

Registration forms will soon become available, which will help you begin to think about what your project is going to be about.

If you are concerned, or have a question, then you can speak to Mrs Cosgrove, Megan Kyte or Maisie Swash, who will also be helping motivate you to complete your project.

What could I do my project on?

Here are some examples of questions that you could do your project on:

Why is "The Hunger Games" so gripping?

Why do volcanoes erupt?

What led to the rise of the Nazi party?

What is the golden ratio?

How is the Fibonacci sequence shown in nature?

How is the female brain different to the male brain?

Is graffiti art or vandalism?

How does Velcro work?

You can present your project however you would like- it could be a report, a piece of music, a construction, a film, a booklet, a story or even a piece of artwork.
