

Year 7 Easter Half Term Science Challenge

Produce a poster on the topic

“How are birds adapted to enable them to fly?”

Prizes will be awarded for effort, detail and scientific understanding.

Remember to think about the birds anatomy and structural adaptations. Giving examples and comparing them to non-flying animals will add context.

Year 8 Easter Half Term Science Challenge

Research a scientific discovery that has occurred since 2010

Write a newspaper article about your chosen discovery. It should include what the scientific discovery was, why it's important and the impact it has had on the world.

Prizes will be awarded for effort, detail and scientific understanding.

Remember to think about how you will explain the scientific discovery to other people. You will need to explain what any key vocabulary means and any wider impact on people.

Year 9 Easter Half Term Science Challenge

Produce a revision game for one of the science topics you have studied.

This could be a board or card game style activity.

Prizes will be awarded for effort, detail and scientific understanding.

Remember to think about how your game will be fun, how someone can win and most importantly how they can improve their scientific understanding.
